# Bijan Parvin

**Senior Software Engineer | Tech Lead | Full Stack (Frontend-Focused)**

California, United States • bparvin12@gmail.com • (714) 200-9481 • linkedin.com/in/bparvin12 • bparvin.io

## PROFESSIONAL SUMMARY

Senior Software Engineer and Tech Lead with 7+ years architecting and operating enterprise eCommerce platforms on MACH / composable architecture. Technical lead for a multi-region commerce platform built on Next.js, TypeScript, GraphQL, CommerceTools, and Contentful, serving North America, Japan, and Europe. Owns systems end to end: architecture and build-vs-buy decisions, payment and search platform migrations, LLM chatbot infrastructure, cloud cost and security posture, and the mentorship that scales a team.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript (ES6+), Node.js, SQL, HTML5, CSS3

**Frontend:** React.js, Next.js (App & Pages Router), React Server Components, SSR / SSG / ISR, React Hooks, Redux, Tailwind CSS, Material UI, Storybook, design systems, atomic component architecture, design tokens, WCAG accessibility, Core Web Vitals

**APIs & Data:** GraphQL, Apollo Client & Server, federated subgraphs, Backend-for-Frontend (BFF), REST, webhooks, JSON-LD structured data / schema.org

**Architecture:** MACH architecture, composable commerce, headless CMS, API-first design, microservices, serverless, event-driven pipelines, monorepo (Turborepo), mach-composer, infrastructure as code, feature flags, caching strategy, architecture decision records

**Commerce & Content:** CommerceTools, Contentful, Algolia Search, OrderGroove Subscriptions, Power Reviews, Amplience, Shopify

**Payments:** CyberSource (SOAP and REST), PayPal / PayPal Express Checkout, Adyen, PCI-conscious integration, AVS and fraud screening, settlement and merchant reference data

**Cloud & DevOps:** AWS (Lambda, EC2, S3, API Gateway, DynamoDB), Vercel, Cloudflare (CDN, WAF, bot management), GitLab CI/CD, GitHub, Git, Dependabot, release management, cloud cost optimization

**Observability:** Datadog, New Relic, Google Analytics, Google Tag Manager, alerting, incident response, root-cause analysis

**Security & Compliance:** OneTrust consent management, penetration-test remediation, rate limiting, WAF policy, CAB change management, secure session handling

**AI:** LLM chatbot integration, classifier and agent prompt review, safety guardrails, AI-assisted developer workflows

**Ways of Working:** Agile / Scrum, technical leadership, mentoring, code review, epic decomposition, level-of-effort estimation, Jira, Confluence, technical writing

## PROFESSIONAL EXPERIENCE

**Senior Software Engineer, Tech Lead — Metagenics, Inc.** May 2019 – Present | Aliso Viejo, CA

- **Platform architecture —** architect and tech lead for a three-region MACH commerce platform: Next.js/TypeScript Turborepo monorepo, GraphQL BFF, CommerceTools, Contentful, Algolia, OrderGroove, infrastructure-as-code on AWS, Vercel, and Cloudflare.
- **API composition layer —** own the GraphQL BFF and federated subgraph boundaries as the single contract between storefront and vendor APIs, standardizing auth, caching, error handling, and server-side feature-flag evaluation.
- **Content and search architecture —** designed the article content platform, including a typed two-phase hydration model that eliminated a class of production query-size failures, and an event-driven serverless Algolia indexing pipeline chosen over the CMS-native template after a POC.
- **Payments architecture —** led the CyberSource SOAP-to-REST and PayPal migration, defining target architecture and a feature-parity analysis across merchant references, line-item fidelity, and AVS/fraud payloads that set the go-live gate.
- **Subscription and pricing systems —** modeled recurring-order pricing across the commerce platform and ERP boundary, separating quantity-keyed from frequency-keyed discounts and defining ownership to stop logic duplicating across services.
- **AI platform engineering —** own integration architecture for a customer-facing LLM chatbot: identity propagation through the BFF for anonymous rate limiting, consent-gated loading, penetration-test hardening, and classifier safety review.
- **Edge, performance, and cost —** architect the delivery tier on Cloudflare (CDN, WAF, bot management) and Vercel, tuning SSR/SSG/ISR strategy, caching, and Core Web Vitals, and treating cloud spend as an engineering concern.
- **Frontend systems —** direct design-system and component architecture: atomic composition, design tokens, Storybook, WCAG accessibility, and structured-data SEO across clean URL patterns and schema.org markup.
- **Modernization and developer experience —** drove TypeScript v4→v5 and Next.js v12→v14 migrations across the monorepo and automated dependency governance; set code quality, testing, and version-control standards that cut post-release defects 30%+.

- **Delivery infrastructure —** designed CI/CD across GitLab, Vercel, and AWS, cutting release times and deployment overhead 40%, with Datadog and New Relic underpinning observability and incident response.
- **Technical leadership —** set direction through spikes, decision records, and LOE analysis driving build-vs-buy calls; mentor engineers on system design and code review; partner with Product, Design, and Marketing on sequencing.

## SELECTED PLATFORM WORK

**metagenics.com — North America eCommerce Platform** Nov 2023 – Present

- Led the full lifecycle of a ground-up Next.js, React, and TypeScript build, architecting integrations with Contentful, CommerceTools, Algolia, OrderGroove, and CyberSource.
- Optimized AWS, Cloudflare, and Vercel infrastructure supporting 99.9% uptime and sub-second page loads, with CI/CD and Datadog monitoring behind every release.

**metagenics.fr — Bionutrics / Metagenics France** Jan 2022 – Present

- Led frontend delivery in React, Next.js, and TypeScript, integrating Adyen payments, Contentful localized content, and CommerceTools catalog and order management for the European market.

**metagenics.co.jp — Japan eCommerce (legacy, migrated to metagenics.com)** 2020 – 2023

- Built the APAC storefront on Next.js, React, and Contentful, integrating CommerceTools, CyberSource, and Google Analytics / Tag Manager.

**portal.metagenics.com — Practitioner Portal (legacy, migrated to metagenics.com)** 2019 – 2023

- Built the B2B portal for healthcare professionals to manage patients, orders, and education content, on React, Next.js, TypeScript, and GraphQL with CommerceTools, Contentful, and OrderGroove.

## EDUCATION

**Continuing Education, Software Development** — University of California, Irvine • Irvine, CA • 2019

**Bachelor of Science, Chemistry and Biochemistry** — California State University, Fullerton • Fullerton, CA • 2018
