Bijan Parvin

Solutions Engineer | Sales Engineer | Technical Account Manager

California, United States • bparvin12@gmail.com • (714) 200-9481 • linkedin.com/in/bparvin12 • bparvin.io

PROFESSIONAL SUMMARY

Senior software engineer and tech lead with 7+ years on the buying and implementation side of enterprise SaaS, now moving into technical pre-sales. Has evaluated, integrated, and operated CommerceTools, Contentful, Algolia, OrderGroove, Adyen, CyberSource, PayPal, OneTrust, Vercel, Cloudflare, and Datadog inside a multi-region commerce platform. Runs the solutions engineering motion daily: discovery, proof-of-concept builds that validate or disqualify a vendor, integration architecture, effort and cost analysis, and translating platform mechanics for non-technical stakeholders. B.S. in Chemistry and Biochemistry, seven years in regulated health and nutrition.

SALES & SOLUTIONS COMPETENCIES

Pre-Sales & Discovery: Technical discovery, requirements gathering, consultative needs analysis, solution scoping, technical qualification, vendor and competitive evaluation, build-vs-buy analysis

Proof of Value: POC design and execution, pilot builds, feasibility testing, integration prototyping, technical validation and disqualification

Solution Architecture: Integration architecture, API-first and MACH design, migration planning, feature-parity and gap analysis, sequencing and dependency risk

Business Case: Level-of-effort estimation, cost and ROI analysis, infrastructure spend reduction, trade-off modeling, executive-ready recommendations

Communication: Non-technical stakeholder translation, technical documentation and enablement, knowledge-transfer sessions, cross-functional collaboration with Product, Marketing, Design, and Finance

Relationship & Delivery: Vendor and partner management, third-party escalation, external partner communication, post-sale onboarding and adoption, customer advocacy, change advisory board (CAB) process

TECHNICAL DOMAIN EXPERTISE

Enterprise SaaS & Commerce: CommerceTools, Contentful, Algolia Search, OrderGroove Subscriptions, Power Reviews, Amplience, Shopify, headless CMS, composable / MACH commerce, B2B and D2C, subscription and recurring revenue models

Payments & Fintech: CyberSource (SOAP and REST), PayPal / PayPal Express Checkout, Adyen, PCI-conscious integration, AVS and fraud screening, settlement data, ERP pricing integration

MarTech & Analytics: Google Analytics, Google Tag Manager, Datadog, New Relic, Aspire affiliate and influencer platform, conversion tracking and attribution, SEO and structured data, feature-flag rollout

Cloud & Infrastructure: AWS (Lambda, EC2, S3, API Gateway, DynamoDB), Vercel, Cloudflare (CDN, WAF, bot management), serverless architecture, CI/CD, cloud cost optimization

Privacy & Compliance: OneTrust consent management, cookie and consent gating, penetration-test remediation, rate limiting, WAF policy, change management

AI: LLM chatbot deployment, classifier and agent prompt review, safety guardrails for health and supplement guidance, AI tooling adoption for team productivity

Engineering Fluency: TypeScript, JavaScript, React, Next.js, Node.js, GraphQL, REST, webhooks, SQL, Git — able to read a prospect's codebase, build a demo, and debug an integration live

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Tech Lead — Metagenics, Inc. May 2019 – Present | Aliso Viejo, CA

- **Discovery to recommendation —** ran a full evaluation cycle on a search platform initiative: gathered requirements from marketing, built a POC that disqualified the vendor's native integration path, designed the alternative architecture, and published the effort estimate leadership approved.
- **Vendor migration and risk framing —** led a payments platform migration (CyberSource SOAP to REST, PayPal), running a feature-parity gap analysis that exposed missing merchant references, dropped line items, and absent AVS data, then paused go-live until closed.
- **Partner escalation —** owned a third-party affiliate conversion-tracking failure end to end: isolated the cause to a URL parameter allowlist stripping the transaction ID, drove the internal fix, and drafted the partner communication.
- **Technical translation —** author stakeholder-facing documentation on search indexing mechanics, deployment practices, and platform architecture, used across marketing, product, and leadership.
- **Revenue-facing partnership —** work with Marketing and SEO on clean-URL strategy, structured data, and a clinical-studies content experience, scoping requirements and flagging sequencing risk rather than over-promising.

- **Cost and ROI analysis —** traced an unexplained hosting cost spike to crawler traffic bypassing WAF policy, drove the remediation, and documented the change through the change advisory board.
- **Business case development —** produce level-of-effort estimates, risk analyses, and worked pricing models that let non-technical stakeholders decide; prevented an unnecessary workstream by proving a subscription flag affected only display copy.
- **AI product experience —** deployed and support a customer-facing LLM chatbot, including penetration-test hardening and classifier prompt review for supplement-safety and prescription-treatment boundaries.
- **Enablement —** led onboarding, mentorship, code-review standards, and knowledge-transfer sessions for a team of engineers — the same motion that drives post-sale adoption and expansion.
- **Global delivery —** shipped multi-region platforms across North America, Japan, and Europe, coordinating stakeholders across time zones, languages, and regulatory environments.
- **Vendor lifecycle —** run a structured program for tracking, batching, and communicating third-party platform and library upgrades across the organization.

Web Developer (Client Engagement) — Brown Benefits Insurance Services Oct 2023 – Dec 2023

- Ran a direct client engagement from requirements gathering through delivery, building the company's marketing site to brand and WCAG accessibility standards with a non-technical stakeholder throughout.

SELECTED PLATFORM PORTFOLIO

metagenics.com — North America eCommerce (Nov 2023 – Present). Led a ground-up Next.js and TypeScript build integrating Contentful, CommerceTools, Algolia, OrderGroove, and CyberSource on AWS, Cloudflare, and Vercel.

metagenics.fr — Bionutrics / Metagenics France (Jan 2022 – Present). Led frontend delivery integrating Adyen payments, Contentful localized content, and CommerceTools order management.

metagenics.co.jp — Japan eCommerce, since migrated (2020 – 2023). Localized APAC storefront on CommerceTools, CyberSource, and Google Analytics / Tag Manager.

portal.metagenics.com — Practitioner Portal, since migrated (2019 – 2023). B2B portal for healthcare professionals, integrating CommerceTools, Contentful, and OrderGroove.

EDUCATION

Continuing Education, Software Development — University of California, Irvine • Irvine, CA • 2019

Bachelor of Science, Chemistry and Biochemistry — California State University, Fullerton • Fullerton, CA • 2018
